

Add Radius & Samba Schemas to an Existing Schema: Download the schemas and place them in the `/usr/local/openslp/etc/openslp/schema.d/samba` directory (do not create a new schema, it is only created if necessary) and specify the path to the tables in the `/etc` file. The `/etc` file will then be restarted and the folders containing the appropriate schemas will be added to the table. P.S. If you need more powerful schema processing, you can refer to the Openslp documentation. You must enable Javascript in your browser for the site to work optimally and display sections in full. Leave your phone number or email address. We will contact you!
