As of 2016, AutoCAD had about 15 million users worldwide. AutoCAD is used by architects, drafters, mechanical, electrical and other engineers to create 2D and 3D drawings of objects. It is one of the best-known applications in the CAD (computer-aided design) field. AutoCAD is regarded as one of the best tools for manufacturing engineers. It provides the ability to plot the geometry of a 3D object and make detailed changes to it. It also allows users to model assemblies and other mechanical assemblies. AutoCAD's strengths include its ease of use, its simple handling, the speed at which it can be used, and its professional-level data structure. Its simplicity makes it particularly suitable for non-technical users of CAD. It is the most popular design software in the world and competes with the "big 3", which are AutoCAD (Autodesk), Inventor (Autodesk), and Solidworks (Dassault Systemes). Reverse engineering Another tool used in AutoCAD Cracked Accounts is reverse engineering. It allows the user to reverse engineer the structure of an application based on a running instance. This includes functionality such as obtaining all available objects, adding, removing and converting them to entities and reordering them. AutoCAD is also capable of reverse engineering a AutoCAD component. This is done by using its API function CreateObject(), and then reverse engineering the object to obtain its.NET-based assembly

name and the type name. AutoCAD Reverse Engineering Tools and Systems (ARTES) is an alternative to the GUI, by doing this, the user is able to obtain a list of the assemblies that contain the GUI code, and the assemblies that contain the code that implements the behavior of the AutoCAD application. Many AutoCAD third-party components have similar tools to allow reverse engineering and exporting of code, such as Component Designer for.NET, JPD, QADR, Aderware etc. AcadSys In 2006, AutoCAD and 3D Systems, acquired Academy Systems, Inc. (ASI) in order to further develop the educational software line of products for schools and colleges, which included AcadeSchool, ArtsSchool, and FormulaSchool, from the SchoolNet Company.
