What is AutoCAD? AutoCAD is an application that allows you to create 2D and 3D drawings, models, and project files. It is designed to create 2D plans and 3D models for architectural purposes, as well as 2D plans and 3D models for engineering and construction projects. It is very similar to CAD programs from many other companies. If you are familiar with other CAD software from other companies, AutoCAD should be very familiar to you. How to Import and Export.DWG Files You can use AutoCAD to create or update 2D and 3D drawings. You can also use AutoCAD to view and work with drawings. You can import a 2D drawing from a file on your computer into AutoCAD. You can also export a 2D or 3D drawing to the file format supported by AutoCAD. Once you import or export a file, you can view and edit that file in a number of different ways. Importing and Exporting files from AutoCAD To import or export a file from or to AutoCAD, you use the same techniques used to open a file in a different application, for example, importing or exporting a 2D or 3D drawing into or from a CAD application. To import a drawing into a 2D drawing, follow these steps: In the toolbar, click Import Data, then choose Import Data. In the Import Data dialog box, from the Drawing drop-down list, choose the file type. Select the Open option. In the Open dialog box, select the file you want to import. The drawing appears in the drawing area. To import a 2D drawing into a 3D drawing, follow these steps: In the toolbar, click Import Data, then choose Import Data. In the Import Data dialog box, from the Drawing drop-down list, choose the file type. Select the Open option. In the Open dialog box, select the file you want to import. The drawing appears in the drawing area. To export a drawing from AutoCAD, follow these steps: In the toolbar, click Export Data, then choose Export Data. In the Export Data dialog box, select the file type. Click the Options button. In the Options dialog box, choose the file type and file name you want to use for the exported file, such as a PDF, EPS, or RTF. In the Options dialog box, select the options you

You can also set the Markup Assist dialog to edit the imported markups (for example, to edit the dimension lines). Direct Snap: Get three-dimensional accuracy on the drawing canvas. You can easily see and edit the position of your drawing relative to the current position of the mouse, and the draft view is updated as you move your mouse. (video: 1:53 min.) Subdivision support: Insert any number of subdivision surfaces to any shape, line, or polyline, including those that are rotated or mirror-symmetric. Insert subdivision surfaces on paths and polylines. (video: 3:14 min.) Lock: Turn on or off any layer on any drawing file, even if you're working on a different drawing or different drawing settings. Locking layers prevents accidental changes from being made to your drawing. (video: 1:53 min.) Dynamic Editing: Experience work-on-work drafting with real-time geometry and UI feedback. Autodesk 2D/3D CAD allows you to view your work in 2D or 3D space, as desired. (video: 1:05 min.) Layers Panel: Easily work on multiple layers simultaneously. You can hide, copy, delete, or duplicate layers. When a new layer is added to the drawing, it's linked to the same drawing file as the other layers. (video: 1:17 min.) Commenting: Automatically insert comments into your drawing. Add comments to drawings to communicate your design intent. (video: 1:26 min.) Contextual menu commands: Get access to more commands on the drawing canvas by pressing the ESC key, then selecting commands from the active tool. Macro recording and playback: Save your keyboard shortcuts as macros and apply them instantly from the keyboard. Macro buttons allow you to select commands quickly. Create and save macros by recording a keystroke or key combination. (video: 1:45 min.) Editing bar: Use multiple tools to work more efficiently on large drawings. The Edit Bar can be collapsed or expanded so you can work with a combination of tools in the upper half of the screen while keeping all your work on the drawing visible below. (video: 1:29 min.)
