The present invention relates to the compound 1,1-dibutylhydrazine of formula: ##STR2## and a process for the production thereof. The present invention also relates to a process for the production of the new compounds used as intermediates in the production of pyridine or piperidine derivatives, namely dihydro-2H-pyridine-1-carboxylic acid of formula: ##STR3## wherein R is selected from the group of C.sub.1 -C.sub.4 alkyl and R.sub.1 is selected from the group of C.sub.1 -C.sub.4 alkyl. The above-mentioned compounds are useful in the preparation of compounds having therapeutic utility, particularly in the treatment of cerebrovascular disorders (for example, cerebral thrombosis, stroke, ischemic attacks, hemorrhages, circulatory disorders, epilepsy, hypertension, etc.). The compounds of formula (I) can be produced by the following reaction: ##STR4## wherein R is selected from the group of C.sub.1 -C.sub.4 alkyl and R.sub.1 is selected from the group of C.sub.1 -C.sub.4 alkyl. According to the process of the present invention, the compound 1,1-dibutylhydrazine is produced by the reaction of dihalo-1,1-dialkylhydrazine with a base.
