This is the true horror of not having children. If you give a fuck about anybody other than yourself and your own survival, then you probably have no heart. The

What's New in the BluetoothLogView?

BluetoothLogView is a lightweight software application whose purpose is to help users monitor the activity of Bluetooth devices and display the information in a log. Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to log the activity of Bluetooth devices in your area on the breeze, without having to go through installation steps. BluetoothLogView sports a clean and simple interface pointing out to the fact that the accent doesn't fall upon the looks of the program but rather on its functionality. The program is able to detect when a new Bluetooth device is located in your area and when the device disconnects from your area. It offers detailed information about the Bluetooth activity, such as the device name and address, event time and type ("Device Arrival" or "Device Left"), device type, as well as the company that created the device. What's more, you can clear the entire log with just one click, use hotkeys for a better control over the entire process, pick the MAC address format, export data to HTML file format, as well as specify a description for every device. During our testing we have noticed that BluetoothLogView carries out a task very quickly, and no errors showed up throughout the entire process. It doesn't eat up a lot of CPU and memory, so the overall performance of the computer is not affected. All in all, BluetoothLogView offers a simple yet powerful software solution for helping you log the activity of Bluetooth devices, and is suitable for all types of users, regardless of their experience level.

14.0 May 16, 2015 BluetoothLogView is a lightweight software application whose purpose is to help users monitor the activity of Bluetooth devices and display the information in a log.
