MANUAL OF PAM CONTRACT 2006 Authors of PAM Contract 2006Ar. This guide sets out the main provisions of the requirement and definition that must be taken into account when preparing and signing a PAM contract and when preparing it for implementation. The main part of the manual is devoted to issues related to the preparation of the contract, and contains the necessary links to the relevant documentation. In recent years, due to the emergence of new legal and technical regulations, however, it is important for the manager to know the main international standards governing the activities of PAM contracts. Most of the tutorial's articles are devoted to the main aspects of developing PAM contracts, but some sections cover other aspects of using contract tools. A short table of contents of the document "PAM Contract Guide" may be useful to staff studying PAM contracts or other types of contracts using international law. The educational publication is intended for students, graduate students, teachers and practicing lawyers who use the international legal mechanism in their professional activities. It will also be useful to employees of the Ministry of Finance, Banking Supervision, DG Finance, the European Commission, as well as all those involved in international trade and international contract management.
