## Hinário 5 Ccb Em Ingles Pdf 107

As said, I need to create a pdf (not an article) with the table that follows. Currently, I am using this code: %% Use the "text" environment here: \documentclass{article} \usepackage[portuguese]{babel}

```
\usepackage{graphicx,tabularx,booktabs,tabularx,multirow,colortbl,tabular} \begin{document} \begin{table}
\begin{tabularx}{\textwidth}{X*{2}{S[table-format=4.2]}X*{2}{S[table-format=4.2]}} \hline \centering \textbf{Codigo} &
\multicolumn{2}{c}{\textbf{ID}} & \multicolumn{2}{c}{\textbf{Nome}} & \multicolumn{2}{c}{\textbf{E-mail}} \\ \hline
\hline \end{tabularx} \end{table} \end{document}
```

What is that ^\* asterisk notation (see the example I added)? I guess that it is something related to the syntax of textwidth and textheight, but I don't know how to use it. Thanks in advance. A: \textwidth and \textheight are just width and height of the text part. It's OK to use them in inline environments, like if you want to put a text width or text height on a second line. The \*{2}{S[table-format=4.2]} and \*{2}{S[table-format=4.2]} are the means to decide in which columns the text is using 4.2 columns and 2 rows or 4.2 columns and 1 row. For the first column (text), the text will use 4.2 columns and 2 rows. For the second column (id), the text will use 4.2 columns and 1 row. So, it will add the text and the \*{2}{S[table-format=4.2]} to the first column and the text will use 4.2 columns and 2 rows. Your table must not have more than two columns. \documentclass{article} \usepackage[portuguese]{babel} 3e33713323
