No matter what type of documents you are working on, iA Writer will give you the best possible text editor experience. It has been designed to be a simple and reliable tool, allowing you to focus on your work. Your files will be updated as they are saved, which means that you can have a real-time and in-place experience when editing your text documents. To be honest, iA Writer is not a multi-purpose text editor, but it has some useful features like syntax highlighting, spellcheck, and text snippets. All of these are useful for writing, so that's why they are all there. Now that we have seen the iA Writer main features, we can take a look at some of the useful features of this multi-purpose text editor. Step 2: Launch iA Writer and point to the file you want to open. Click Open. Step 3: The interface will have iA Writer's editor pane on top, and the Files pane below it. To hide the Files pane, click the button on the far left side of the iA Writer top. Step 4: A little window will pop up, showing you all the recently opened files. Close it by clicking the red x symbol. Step 5: Now, you will have a blank area on your iA Writer screen. You can use it to create new files or import existing ones. To create new files, click the button on the far right side of the top bar. The iA Writer panel will appear with the files that you just created. Step 6: If you want to add formatting, you can click the button at the bottom of the panel. The panel will open so that you can see the all the formatting settings. You can change them, save them, or export them to other formats. Step 7: You can work on your text files as you like. The toolbar on the top bar will give you useful shortcuts to easily navigate through your text and make the editing process easier. Step 8: iA Writer has also a configuration panel, where you can change all of the interface settings. You can toggle the panels, switch the fonts, change the layout or even color your texts. To make your life easier, there are also dedicated buttons on the left and right sides of the top bar. In addition to the editing and formatting functions, iA Writer also supports the following file types. Markdown

I want to display it in a way that the width is equal to the height. So the problem is that I have a different aspect ratio than the screen and the aspect ratio of my tablet. My screen has an aspect ratio of 4:3 (like a TV). And my tablet has an aspect ratio of 16:9 (like a TV). So I set this: But the result is different than I want. The screenshot is not resized (so not the aspect ratio is fitXY). The height is not scaled (so the aspect ratio is not 16:9). I tried many different values for android:scaleType. What is the value that will give me the correct result? Thanks in advance. A: Use this in your ImageView tag.
