Paint.NET is an easy-to-use image editing program for the Windows operating system. Paint.NET supports all popular image formats including JPEG, PNG, GIF, and BMP, and offers many advanced features. It supports layers, blending modes, and image filters. The program is very easy to use and is intended for the beginner or casual user who needs a very powerful and easy-to-use image editing application.

Description: 3D-Labs is a Python based, GTK based graphics visualization tool for creating 3D and 2D graphs. It supports contour, surface, scatter, bar graphs, 2D plots and mesh graphs. It supports the creation and the conversion of meshes and supports curve, surface and contour equations.

3D-Labs supports the creation of plots as HTML documents. 3D-Labs can be used in education, research, industry, government and defense as well as in the development of graphical tools, software applications and websites. Description: Illustrator, the drawing application for print, web and multimedia, is available for Windows, Mac OS, and the Adobe Creative Suite. It provides an innovative interface for all aspects of working with drawings, including easy and direct access to layers, guides, and other drawing tools. The application is popular with both beginners and professional users, because of its ability to work efficiently, and its affordability and ease of use.

Description: The GNU Octave suite of open source software provides a full-featured interactive computing

environment with powerful mathematics and statistics functionality. It is developed and maintained by a team of volunteers. Octave provides high-level mathematical functions that are similar to those in Matlab, and it also offers low-level access to the C or C++ programming languages. Octave offers efficient matrix multiplication, common matrix operations, linear and non-linear equations, and statistics, linear algebra, and graph analysis. Octave also allows programmers to easily integrate C, C++ and Fortran code from within their Matlab programs. It can be used as a tool for teaching, research and education, and for creating algorithms and applications. Description: GraPhPad is a graphical front-end for the GNU R statistical language. It allows interactive editing and manipulation of R objects from your graphic software. It provides an integrated shell for R, graphics support for R graphics, and integrated plotting support for R graphics. It also offers an API to manipulate R objects from other programs.
