You can find the whole list of books by Maths.xlsLast March, Kerem Mürden's selfie with a large noose around his neck went viral. He was arrested a week later on terrorism charges and has since been released. Turkish police nabbed a 29-year-old man named Kerem Mürden and charged him with "terrorist propaganda" for a photo he took in March in which he posed with a noose around his neck, in an image that went viral. In the photo, Mürden's face is blurred out. He's in a white T-shirt with a pistol mounted to his hip and an AK-47 rifle next to him. After the photo went viral, hundreds of millions of people saw it and many shared their sympathies with him online, with many telling him to "go home" and "go to the mountain." Mürden was released from prison in Turkey at the end of last month. "I am freed after spending eight months and 27 days in jail," he told BuzzFeed News. Mürden was upset when he saw the tweet saying he was free, but felt let down by the Turkish government, because he thought he would be sent back to prison. His friend who was jailed with him on terrorism charges was also given his freedom last month. But on Monday, Mürden was arrested again in a prison in Ankara, after wearing an item of clothing that was allegedly a suicide belt and a hand grenade. "After they released me [from jail in March], I was a free man," he said. "I wanted to stay out of trouble, and I didn

You can also give us File Upload information or any other detail Thanks again for downloading and help from Astro hosting Q: PWA in an existing Web Application I want to create a Progressive Web App for a current web application which is based on AngularJS 2. Which frameworks are available for this case? I just want the basic functionality of a PWA, like a notification center and offline support. I saw this question: Is possible to create a Progressive Web Application for an already existing webpage/app? But the answers are outdated. A: There are many options for building a PWAs, such as Apache Cordova, Electron, NativeScript, and just plain old Angular. Which way to go, it depends on how flexible you want your app to be. Spectroscopic analysis of three-dimensional supramolecular arrangements. The supramolecular arrangements formed by two- and three-dimensional networks are shown as examples of the possible assembly of molecules in aqueous solutions and in the gas-phase. These assemblies are characterized in solution by different techniques, including wide-angle X-ray scattering, angle-resolved infrared and UV-vis spectroscopy, differential scanning calorimetry and freeze-fracture electron microscopy. They are shown as an example of the possible organization of molecules and molecular aggregates in water-based solutions and in the gas-phase.
