The Elden Ring is in its last stages of corruption, and in order to realize its true potential and become the ruling Elden Lord, the hero must return to the Lands Between and defeat a monster of immense power. A hero of the Elden Ring cannot return from the Lands Between by his own power, and must be guided by Grace and become a Lord. You're in a world where the rules of reality and the laws of nature are different than those in the Mundus, which means that there are many obstacles to overcome in order to open the gate to the Lands Between. Your abilities are your only power as an Elden Lord, and you can combine dozens of different elements together. If you choose to succeed in your mission, however, the world will no longer be the same, and even the Mundus will change. Once you and your friends complete the final goal, you will be immersed in an eternal loop of adventure, eternal romance, and epic battles. . And of course, all your friends will be sharing the same excitement! "...[RPG fans] can check out the game for themselves as the VR experience is not too cumbersome or too taxing to the eyes. Furthermore, Tarnished steps up on the visual side as it brings to life vast amounts of action that on the ground would be just a cool experience, even at a classic point and click adventure. Instead you are captured through the eyes of your character in stunning 360-degree cinematics that you can even touch, using the Touch controllers which also include a microphone and motion sensors. In addition, the whole virtual reality experience runs on a PlayStation VR system but it is completely standalone and won't need the Headset. If you own a PlayStation VR system it's already mandatory to at least get one copy of Tarnished VR in the PS4's library and with the right VR headset. Once you try it out, it won't leave you without fangirling for a long time." —ADWORD ON TERROR PHYSICAL 2019 "The Headset is not 100% needed in order to enjoy the game, although it will increase the experience and offer a more deep immersion into the virtual world, not to mention make the whole experience much more enjoyable." —RedBrick 2017, PlayStation VR, PlayStation 4 "...if you're truly interested in VR gaming and the VR future, and you're not tied to a PlayStation 4, than this will be a must have." —LONG METAL GAMES 2017 "Tarnished VR is an innovative and well thought out experience and something that any fan of the Tarnished universe or of immersive gaming in general should be aware of. It's also a title that should be on everyone's radar as the designers at Tarnished have put the same passion and dedication into their VR project that they did into their regular game." —SOULSITE US 2017 "While Tarnished VR is a wonderfully crafted experience, it's also something that even casual fans should know about. VR gamers who are on the fence should have a look at Tarnished VR to see what it is that pushes them over the edge." —ANDROID HORIZON VERIFIED 2017 "This is the best looking VR game you can buy..." —MR GUZMAN 2017 "The first in the series is a bff6bb2d33

What's new in Elden Ring:

In IDris, players seamlessly connect to another gameserver, instead of having to input a command every time. IDris binds to gameservers, not to players, so the number of players allowed to connect is fixed, rather than one at a time.

REAL PLAYER COMMUNITY PRACTICE MODELS (From Discussions on Launch):

- **A Wall-Based Matchmaking System** The IDris connection system uses a wall-based matchmaking system, meaning you can prevent other players from connecting, talk to them in IDris, and then proceed to the queuing system.
- **Notifications for all Join/Part States**
- **Notifications for Change in Location and Details for Join/Part**
- **Unique Party System**
- **Easy to Claim Friendships**
- **Early Registration for Competitions**

Furthermore, the company has released some of the IDris previews so far!

This is part 2 in the series on infinite contexts. See part 1 here. As we have seen, we can represent contexts of a type by an infinite list of type values. This is a strategy that I call "list type" in contrast with "type family". In this series, I will continue to use "list type" as the name for the approach. Now let us see how we would model the set context using this approach. I will write `s t r u` where `s` is the source, `t` is the type, and `r` is the renaming. `{ -# LANGUAGE RebindableSyntax #- } { -# OPTIONS_GHC -Wall #- }` `module Main (main) where import Control.Applicative (Applicative) import Control.Monad.State (StateT) import Control.Monad.Trans (MonadT) import Data.Monoid (()) import qualified Data.Map as Map import Data.Set (Set) import Data.String (String) import qualified Data.Text as T import qualified Data.Text.Lazy.Builder as T import qualified Data.Text.IO as T import qualified Data.Text.Lazy.Builder as B import Data.Text.Lazy.Encoding (Text, toLazyText, fromMaybe) data Set a = Set [a] deriving (Eq, Ord, Show) instance (Eq a) => Eq (Set a) where a `Set.` b = Set.union (a `Set.` b) instance (Ord a) => Ord (Set a) where a `Set.` b `Set.` c = Set.union (a `Set.` b) (b `Set.` c) set `Set.` [] = Set.empty set `Set.` (x : xs) = Set.insert (x) as instance (Show a) => Show (Set a) where show Set.empty = "Set.empty" show (Set (x : xs)) = "(" (show x) "," (show xs)) set1 = Set.fromList [1] set2 = Set.fromList [1,2] set3 = Set.fromList [1,2,3] set4 = Set.fromList [1,2,3,4] set5 =`

Traveling through the blog-sphere lately (as much as my health allows) and seeing all the beautiful post cards, photos and videos, have inspired me to take some shots as well. A couple of these photos I was able to record in Lisbon, but a couple of the shots where taken in 2008 and 2010 while on our Grand Tour of Australia and NZ. I'm working hard to narrow the small selection and hopefully will be able to share a few more in the near future. In the meantime I hope you enjoy them! (and that I haven't forgotten you!!)Modern mobile devices are designed to meet many varied usage needs for a user. Mobile phones, smart phones, tablet computers, portable music players, and the like include capabilities that extend out of their traditional usage model, allowing the user to interact with other parties, including conducting phone calls. A significant problem of mobile devices is the subscriber's session termination. Mobile devices are portable and people frequently use such devices to establish voice or video calls. As a result, the devices experience a high number of session terminations due to users hanging up a call even when they only want to put their mobile device away and come back to it a few minutes later. Session terminations may occur for a variety of reasons, such as not having an adequate mobile signal, user activity
