An original fantasy action RPG, the title features a world where you take on the role of the protagonist and experience extraordinary adventure in a vast world. In this world, you can freely customize your appearance, equip powerful weapons, armor, and magic, and challenge enemies in battle. Featuring a three-dimensional battle system, a sense of excitement and adrenaline will flow as you fight against powerful enemies. ABOUT GAMESLIFT INC: GAMESLIFT INC. Headquartered in Tokyo, Japan, the company has expanded its business to a global scale over the last decade, including games, content, events, and services. GAMESLIFT INC. has been involved in producing and operating games as core business, and the development of the “Elden Ring” and other related services has been recognized as strategic business. The company was founded by a group of former Dragon Quest staff, including the brand manager of Dragon Quest XI, the producer of Dragon Quest VIII, and the creator of Zunō no Kaiki, director Akihiro Hino. The “Elden Ring” and related services are licensed by Square Enix Co., Ltd. © SQUARE ENIX CO., LTD. All Rights Reserved. Comparison of plant height and crown density estimated by laser-Doppler and canopy radiometry. Estimation of the spatial variations of plant height and crown density is very important in forest ecosystem research and management. Two methods, laser-Doppler and canopy radiometry, were applied to simultaneously map the crown density of two plantations (Eucalyptus and Pinus) in northern China. The crown density estimated by laser-Doppler (CDL) was positively correlated with the canopy transmittance at red wavelength, while the crown density estimated by canopy radiometry (CR) was significantly and positively correlated with the leaf area index. On average, the CDL and CR crown densities were 84.8 and 79.2 m(-2), respectively. The ratio of CDL to CR crown density was 1.11. The ratio of CR to CDL crown density was, however, significantly different for the two plantations. The results indicated that the canopy radiometry could be more suitable for obtaining the crown densities of Eucalyptus plantations, but the laser-Doppler could be more suitable for obtaining the crown densities of Pinus plantations. Real-time location (

Features Key:

Born of the Myth! Battle the monsters of the Northern Plains and join the “Dynasty of Elden Lords” to win the title of an Elden Lord.

Enjoy the exciting and diverse game of Darkside from NGS. 5. Read the full story of Darks

What's new in Elden Ring:

- Tarnished By the time you read this, and however much you crave it, you may already be one of the shadows that will crumble the lands of Rellines. The people you call your own might be falling before you. The Lands Between is divided into two parts: within is a crystalline paradise full of harmony and peace. The second is a bleak shadowland full of death and tragedy. While the good guys struggle to bring the world back together, the enemies hide themselves in the shadows. The power of the Elden Ring has been the most universally respected symbol of good over evil in the lands for generations now. The King's power, the Alliances forged with the other Powers, and the greatest heroes and heroines of Rellines fight and die to protect this meaning. Rellines has long been plagued with the shadows that hide themselves deep within. Those who fail to follow the eternal values accepted by the people are the ones who conspire to threaten the good of the people—they have grown too much and corrupted the people themselves. Those who have taken the side of evil and destroyed the world is your chance to take up the mantle of light, to repair the broken world.
