Firefly Online Cortex [Latest]

Is an action adventure collectathon. Play your way every time! GameGenix made the decision to base our game content on the popular Dragon's Crown franchise, given our backgrounds and prior work on this property, as well as our ability to ensure a high level of quality. Genix realized that if we wanted to compete with the Dragon's Crown franchise on a number of different platforms as well as for an audience that might not be familiar with the Dragon's Crown franchise, we needed to develop a game that was true to the core values and features of Dragon's Crown, while introducing a number of new gameplay mechanics and elements. RAWSHIRE'S STORY This is a story about a young dragon dreaming of becoming a hero. A dark evil has attacked Rawshire, forcing dragons and humans to unite in a time of need. It is up to you to decide the fate of the dragons, and Rawshire! If the journey is to be done, it starts now! SUPPORT ME! If you like my games or this journal, please consider supporting me. I need to work my way up the game industry, and with your help I can build my way up! If you like my work and want to support it, you can! Click the banner below to support me on Patreon, and get extra content including concept art, game design documents, and more! My Steam Group - Join the conversation through the Steam Community Group on Facebook! What's new in Firefly Online Cortex:

A fishing village scene. The player character will ride on the right, the dwarf on the left. Posted Fri, Oct 28, 2015 5:02 pm (EST) from the SceneryFiles 83 results for Fishing Village Scene Image Files: Misc: Click to Enlarge This fishing village scene is a scene by the artist Rick Gillette. You can find more of his work at his website which also tells a tale of how the artwork was done. Instructions for these pictures are also available at his site. I don't want to steal his whole story as it's quite a read, but this was just one of the pictures that Rick made for his game called Mafia Swamp Dungeon. This fishing village scene was made with GE Scripts v. 4. To decompile this screen, you need a graphics editor and the GE Scripts files associated with the screen, which can be grabbed from the path below. The decompiled template was created by the author of these scripts. Click To Enlarge or View in Full Size Page. These three JPG files are compressed graphics file format. Usually they are smaller than the actual filesizes. A compressed image generally can be displayed faster than its original size. The compression process makes all sorts of things possible. Photoshop provides a powerful format for compressing graphics files so that they are compact and can be saved faster than in their original size. The filesize of your artwork can be reduced by 30-95%. This benefits your work in the future, but be aware that if you handle them differently the compression process won't be as efficient and your files will take a few minutes longer to load. What's great about these files is that the compression process does not significantly alter the original art. There are a few differences, but the overriding goal is the same. You get to save time and edit your graphics more easily. Click on the image below to open an archive containing PSD file of the image. I've done all the heavy lifting for you.
