MEDIA PLAYER CLASSIC is an easy-to-use, lightweight and full-featured audio/video player which includes support for numerous audio and video formats and codecs as well as an excellent range of features for general use (no sound card required). It is highly compatible with virtually any kind of audio/video file, including MP3s and other audio formats which are not embedded in the files (no DRM!) and even SHOUTcast streaming media. Since Media Player Classic is a multi-threaded application, it can play several media files simultaneously (up to the limit of the host system). Media Player Classic supports playback, capture and translation of streams of multiple audio and video files. Furthermore, it supports all basic features of a typical audio/video player such as video & audio playlists, customizable buttons and controls, as well as recording, chapter browsing and bookmarking. Media Player Classic is generally available for Windows 2000/XP/2003/Vista (32 & 64bit) but also available for Windows 95/98. Get Media Player Classic - Where can I find the win32 codecs for QuickTime? Media Player Classic supports a wide variety of audio/video streams, including those that can be played using the standard system codec packs. As long as the stream is not encrypted, Media Player Classic plays it. Although it is sometimes possible to play encrypted streams in QuickTime Player, MPC does not support this feature. All the codecs required by Media Player Classic (win32) are contained in the standard Windows media player codec pack files. Download the codec packs for Windows and get Media Player Classic -
