In this book, al-Shafi'i writes that: "The two books [Qutb and 'Imam] and the three books [Qutb, Ima, and Abd al-latif] of the Awliya are part of the book of the Awliya" (Tazkira tul Auliya is a continuation of Tazkirat ul Auliya). This view is plausible, because Tazkirat ul Auliya comes before a chapter in Tazkirat tul Auliya where the Awliya are mentioned, and the latter, therefore, is free from any problem in its use [for reading and learning]. The Day the German Air Force Roars into Holland. The coming of the Anglo-Saxon armies in the seventh century to settle in England, as part of Europe. France, Germany and the Urgent Launch of America's Atomic Bombing. M.S. Divided We Fall: The History and Future of Pakistan Welcome to the History Channel. History takes an unplanned detour with dramatically varying time stamps and quality " from coverage of the fall of the USSR and the Gulf War to the Nigerian Civil War and WWII. The volume has been divided into four sections, each of which have been written by a leading historian of Muslim civilization, on a topic of importance to the Muslim world. • The first provides a detailed chronological account of the rise and fall of the early Muslim state, whereas the second study the emergence of the various Muslim empires. • The third is a political history which discusses the current geo-political situation in the Muslim world. • The fourth volume is an analytical study of Islam in a world of global politics. The authors are well known, recognised experts who have already demonstrated their credentials by writing several books on the subject of the Muslim world. The book's author says: "Over the last 40 years, the pace of change and transformation in the Muslim world has been so great, that it would be difficult to understand it without the chronological map that this volume provides. It is a map which charts the movement from darkness to light, and these historians have dedicated themselves to give us a clear idea of the developments in the Muslim world, a map which hopefully will help us to understand the great age of Islam in a world which is undergoing its own. In the Islamic world, the last thousand years represents a new chapter in world history: the Islamic world today stands at the threshold of a new century which began during the first decade of the twentieth century and which is governed by the norms of science and the values of freedom." This book will be a required read for anyone interested in international relations, the Middle East and Islam in general, and for those who want to find out more about the civilisations and cultures of the Muslim world and the Turkish culture in general. Since I have a function which calculates bandwidth of network in bytes.So first i need to make ping on the network and wait for answer.After that i need to caluclate the bandwidth of network.But I don't know which IP sends the packet. I think it's a function which informs me of IP or MAC which send the packet. I don't know how to do that. You can use the command tcpdump -i eth0 -w - -i lo -c 2 -n -s 0,0.5 -tttt on the server. Wait for the Ping command to be send and then the new file contains data about the packets sent. First you can use any type of ping. As command:
