EPIC STORY OF 5 HEROES A long, long time ago, the continent between the two worlds was populated by four races: the Humans, the Elves, the Dwarves, and the Dragons. The Dragons lived deep underground and were continually squabbling, while the Elves were content and lived peacefully with the Humans in the land of Gwydion. The Dwarves lived underground as well, in the harsh and dark region of Gwynivere, and had their own culture separate from the other three races. All of these races were happy and well-lived, and they stood united against the single, most destructive race that was threatening their very existence... THE EVIL DRAGON KING. The Kings of the Dragon Kingdom grumbled, creating discord between them and when, one day, the Dragon King became incensed at the Elf King, he demanded that he be executed. As the Dragon King was marching to the execution, Gwydion, the Dwarf King, defeated the Dragon King in battle and, true to his agreement with the Elf King, spared his life. However, the Dragon King was still intent on revenge. He challenged Gwydion to a duel and, on the battlefield, he defeated Gwydion with one blow. The Elf King, all that time, retreated to his palace in the city of Benue-le-Rabatz, leading the Dwarf King to become the new and rightful ruler of the people, thus starting the saga of the five Heroes. EPIC

MYTHICAL LORE. Long time ago, an evil dragon king dwelt in his mountain palace, surrounded by his three commanders. Every day, he summoned three apprentices to meet with him, choosing one to be his right-hand man. The evil Dragon King has one goal: to fulfill the prophecy that he would be called the "saviour of the world." In order to accomplish this, he seeks to rule the world with absolute power. The good prince of the prophecy has one hope: to defeat the evil Dragon King. In order to try and harness the power he has received, he has sent his three beloved princely sons to look for his lost daughter who had been taken by the one who possesses a mysterious power. The young prince is about to begin his journey when the evil Dragon King captures the three princes and kills them in front of his army. With the sons dead, the evil Dragon King lets his anger and jealousy

12 Replies Well theres that and it opens like never seen before. No longer do my passcode's need to be specified here are those who've managed to get through because theyre fast and really like to add more credit tags to posts just like last time. Yes, the developer will focus more on the development process. He said he would probably spend more time on it in future updates than the initial publication. Added something to the server config if u're using a file streaming server. I think u add it to each of the games configs. If I remember correctly it was in the windows spawn.cfg which made it available to all the games. Even if they did get equal amounts of those ads Im still going to at least give this game like 10 stars. >_> It's been so long since we've read a big update for this game in the last week. New content is exciting but I'd much rather there'd be more frequent updates so we don't need to double check the pages. At least we've got warning indicators at the top of the pages rather than not knowing if there's new updates for the one we're on.

Q: The set theoretic lemma I am wondering if someone could help me with the following problem: Let X be a discrete space, $A \subset X$ a subset of X , and let G be a topological group. Let us define a topology on $X \times A$ by declaring that the basic open sets are of the form: $\bigsqcup_{a \in A} \pi^{-1}(\left(V \right) \times \{a\})$ where $\pi : X \times A \rightarrow X$ is the projection onto the first factor, and $V \subset X$ is open. Proof that $X \times A$ is a topological group if A is a subspace of X with topology of X . A: $X \times A$ is a topological space with this topology. Note that this is a little different from the usual product topology. The usual product topology is the coarsest topology that makes both projections continuous, and so the basic open sets in this space that you describe correspond to the usual product topology. In

Experienced federal prosecutor Anne Milgram has been appointed the new US attorney for the District of Oregon to replace United States Attorney Amanda Marshall, who will be leaving the US Attorney's Office later this month for a position at the University of Virginia Law School. In making the announcement on Wednesday, US Attorney General Eric Holder said Milgram "is a seasoned federal prosecutor with a reputation for excellence. She's a great choice to lead the office." "Anne Milgram has a tremendous reputation for leadership and for excellence and I'm excited about her joining our team," said Marshall in a statement. "I look forward to working closely with her as she

builds on my record of strengthening partnerships and developing a working relationship with the people of the district.” Milgram has served as the US attorney for the District of New Hampshire for the past eight years, where she has built a strong reputation for prosecuting violent drug and fraud cases as well as overseeing serious white-collar crime. There, she has won three federal cases against local officials and 13 cases involving foreigners accused of committing health care fraud. “I’m honored to serve Oregon and the great people of this district as the U.S. Attorney,” said Milgram in a statement. “The U.S. Attorney’s Office is composed of some of the most dedicated, qualified prosecutors and support staff in the nation. As Oregon’s leader, I’ll do everything I can to advance justice and protect our citizens. I’m looking forward to working with state and local law enforcement, judges and our federal partners to keep our communities safe.”
