The Elden Ring is a Fantasy Action RPG where you direct the actions of seven characters (Armorsmith, Warrior, Magician, Thief, Archer, Healer, and Mage), consisting of the party members who appear on the main screen. The characters you control are involved in a multilayered story that unfolds through each play session. The game features plentiful single-player content, including dozens of maps and dungeons with a variety of complex layouts. The characters you play as are also available to play as their own party in multiplayer battles. To experience the online element of the game, the game development is currently in the process of being released, and an official announcement will be made at a later date. ABOUT ELDEN Elden, born from the soul of the Ancients, is the power of the force of destiny. It enables those who are given to it to possess the power of the Elden Ring. One day, the Ancients' spirits reincarnated, and they were given a specific destination. Like the Ancients, the users of the Elden Ring who acquire it receive the power of destiny from the Elden, and are able to survive in a new world as they work towards their goal. You can form a party of up to eight different characters. Each character has a unique class. By fighting together, you can cause monsters that appear on the world map to attack you. If you defeat them, you will acquire EXP points, which can be used to level up your characters and increase their ability. When you accumulate enough EXP points, you are able to unlock a new class and level up your character, and when you become stronger, the monsters you fight will become stronger as well. Armorsmith Crafts items from raw materials. When you attack an enemy, you can use the items you have equipped to various combinations, greatly increasing your chances of a successful attack. When you are attacked, attack your target first and then use the items you have equipped to increase your attack power. Attack as many enemies as possible while avoiding the attack from enemies that know evasion. When a melee fighter attacks an enemy, the target always receives a melee hit. When an attack with a certain item is used, the item that hit the enemy will stick to their body. When you use an attack with another item, they will not hit but the item will stick to the enemy. The faster you repeat each of these two actions
