Sohni Mahiwal free download videos dvd - Watch Free Sohni Mahiwal. Q: How to get a subsequence of an array where the substring in the original array is unique in ruby I have a string: mystring = "sdfd fdfsdfsd sdfdsf" I want a sequence of this string which contain d, s, f. This sequence should be a subsequence of mystring because the order of these letters should be the same. I tried this code: mystring.chars.select { |c| c =~ /[ds]/ } But it doesn't return a result which means it doesn't have a any ds. Any ideas or suggestions? A: Here's a solution that uses Regexp#match, and that returns an Enumerator for the matching patterns. I used a while loop in the range method but you could easily use a for loop if you prefer that. irb> mystring = "sdfd fdfsdfsd sdfdsf" => "sdfd fdfsdfsd sdfdsf" irb> pattern = /(?:\|)Q#{mystring.gsub(/s+/, '\Q\E')}\E/ => /(?:\|)Q#{mystring.gsub(/s+/, '\Q\E')}\E/ 6d1f23a050
