The species are endemic to Australia. The only known species is Metocelia metoceloides which is found in the Northern Territory, Western Australia and South Australia. References External links The Australian Plants online: Metocelia metoceloides. Category: Asteraceae genera Category: Flora of AustraliaStrange matter created in the laboratory Physics world travels to the chemistry lab to see the latest insight into the creation of strange matter 2 Oct 2018 COLLECTIVE IMPACT University of Adelaide/University of South Australia/IPC Resources/Physics World/Science TV Scientists are one step closer to understanding the mysterious world of quark matter by creating strange matter in the laboratory. Australian researchers have used the world's most powerful particle accelerator to create tiny amounts of strange matter in a bid to better understand the mysterious world of quark matter. Until now, strange matter has only been observed in the laboratory in the Universe, but this revolutionary experiment at the Australian National Fabrication Facility allowed the team to create and study strange matter for the first time. c6a93da74d
