FarmingSimulator19CODEXSKIDROW !EXCLUSIVE!

once ive been joined with the game, the system checks the game settings and their status for double clicking. if double click disabled, it won't accept. so, i have to generate to files, run then manually launch the codex. but if double click enabled, then the codex will work fine. i can see those start/error messages. sometimes, it is necessary to manually launch a codex for the game to work. however, in the codex makers tool, ive never seen any option to automatically launch them at the time of running. farmingsimulator19codex by skydr0wr is a farming simulator 2019 mod for the game farming simulator 19. it has been made with the goal to provide the community with an easy and convenient way to play in the game farming simulator 2019. you will be able to place farm buildings and manage your farm in a way that suits your needs. you will be able to import your favorite maps and play all the maps that you have downloaded as well as the contents of the game's resource packs. all this for free of charge. skydr0wr is a farming enthusiast that will always work to provide his user base with the best possible experience. skydr0wr has worked extremely hard to create this mod and he hopes that you will enjoy using it. skydr0wr provides full support for the mod. please check the faq section below to see how to get in touch with him in case you have any questions or problems with the mod. for any issues regarding the mod, or if you are having any problems with it, please give us a quick support request in the comments section below.
