Even Murder Inc.'s dazzling aesthetic fell short of expectations, as artists like Silk The Shocker, Bizzy Bone, and Noreaga left the group before Ja Rule in 1999 to pursue solo careers. Only the signing of Ja Rule and Ashanti seemed to vindicate the labels existence as a powerhouse of popularity and influence. The duo managed to find a compromise between the labels extremes and, as a result, had a huge impact on the evolution of mainstream rap. In that same vein, any achievement of the movement, especially of Ja Rule is arguably owed to Ashtantis tenure. Even though their collaboration together contributed to Murder Inc.'s popularity, it didnt receive the same kind of press that the duo got, which is odd considering Ashtantis solo career is essentially where Ja Rule started and shes the one who played a major role in bringing that kind of all-encompassing mainstream domination. In fact, there are two major reasons Ashesinthe Fire failed to impact me as much as it should have. One is that Ja Rule has been relevant in hip-hop, and hes been in the game for over a decade, which is far longer than the lite-scene haters who bemoan his existence. His contemporary talents like B.o.B and Drake are nowhere near where Ja Rule was in 1999, and it shows. The other reason is that the reason is a little more self-inflicted than Ja Rules perceived failure. The reason why Ja Rule might have been ignored to the extent that he was is because his follow-up album Rule of the World wasnt as successful. If he woulda followed up Ashesinthe Fire with Rule of the World, would the album have been as easy to overlook? Or would it have had the same impact, making it the album that he forgot about?
