Hollywood Strings Diamond Edition East West Mac Torrent

Unlike most of the other software instruments in our catalog, Hollywood Strings uses an all-electronic process. Hollywood Strings, like Pro Loops and Pro Instruments, was conceived as a sequel to the popular Pro.3 Chord and Simple Chords Pro instruments from Loopmasters, and is also one of the first products to be released by Loopmasters so if you're new to their market, this is a very good place to start. The files are fully organized and tagged with some useful information, and they can be loaded into most any music production DAW that supports virtual instruments. Due to the nature of the all-electronic process, loops can be edited in a multitude of ways, and Hollywood Strings is no different. Designed to be a true orchestral synthesizer, Hollywood Strings was produced by Sound Of Music Ltd, who regularly produce some of the world's best orchestral music. As well as a large library of strings and woodwinds there is also brass, percussion, synth and a full complement of electronic instruments including pianos, organs, harps, guitars and a host of effects. Several genres are covered including swing, jazz, piano and romantic styles, baroque and classical. Included with Hollywood Strings are 30 great samples from the Strings category. Any presets you load or create have unlimited polyphony and can be edited for extreme creative control. You can also output MIDI files from your string patches in a MIDI out playlist, which are perfect for matching other MIDI instruments. Simply drag and drop any configured MIDI note from the Hollywood Strings software into your DAW. Hollywood Strings can take high quality MIDI files and create a virtual instruments from them. Once you have created a virtual instrument, edit it and add effects to make a brilliant string orchestra, and import your bank of MIDI files from loops, for some amazing performances. 5ec8ef588b
