
Mybb Premium Themes Nulled Themes [TOP]

We are working on your feedback and will release a new version of MyBB 1.8 in the next few days. In that version we will include some solutions to all the problems you have been reporting in our support centre. We plan to add new functionality to MyBB 1.8 this year.

This will include new features. Some of these features already exist in other forum software, but we want to include them in MyBB. Hopefully we can release these features as soon as possible. The homepage is only one of the ways to change the look of your website. Using the myBB A7 Homepage Builder, you can quickly and easily create multiple pages for your website and create the right look and feel that matches the look of the rest of your website. Along with the Design System, you can create a look and feel that is consistent across all your pages. The Design System is also in use on all MyBB Premium, free and child theme forums. We have not only developed our A7 Homepage Builder, which is used across all templates and stylesheets of our themes. We have also developed a number of plugins, which can make your website even more powerful. These plugins are available on all our themes and are developed in close collaboration with our users to enhance their experience. Our latest version of MyBB 1.8, which is now available on our dedicated theme and child theme download pages is just about ready. We have made some big changes to the way we build themes in MyBB 1.8. This will mean that many types of users will have greater access to features. This includes more users being able to install and use the Forum Explorer and Gutenberg editor in MyBB. We have also changed how we display our logo. We now know more about what works best for you and how you want to create your website or forum.
