ProjViewer 365 is a powerful and easy-to-use software for viewing and creating project files. This powerful and easy-to-use software for viewing and creating project files lets you connect to Microsoft Project, Excel, and Outlook easily from your Mac or Windows PC. Provides the easiest way to view, create, and update your Microsoft Project files on your Mac or Windows PC. ProjViewer 365 let you connect to Microsoft Project, Excel, and Outlook, browse the files in your computer, and easily create new files from them. You can even do file sharing from PC to PC. Microsoft Project Viewer 8.5.0 Build 2409 Project Viewer is a reliable software designed to display the contents of Microsoft Project files, in a variety of modes. Thus, you may view the data contained in MPP files, as a calendar, as a Gantt chart, Network Diagram, list of task usage and duration or as a resource graph. User-friendly interface and presentation tools Project Viewer is simple to use and enables you to harness a Microsoft project file by sorting or filtering the data contained in the tables. Thus you can customize the layout of the project file and optimize it for a presentation, generate reports or monitor the resources used in order to finish the tasks. The software can display the data as a calendar view, as a Gantt chart, highlighting the dependencies, or as a network diagram, displaying the main categories as extensible boxes and indicate the links between columns. Moreover, the Resource Usage tab can identify the desired columns in the project file and extract them for individual display. Management tools You may set several filters in order to highlight the task categories: the completed, pending, critical, milestones and required resources. Moreover, you may display data contained in the tables based on cost entry, hyperlinks, tracking or usage. General text editing tools are available, such as find text, view task notes and information, go to a specific task or divide the tasks to each member of the team. Additionally, the software enables you to export files to several file formats, including saving the selected data to another Microsoft Project file, XML, Excel, PowerPoint Dashboard
