The video game industry is known to be a male-dominated one, as opposed to, say, Hollywood and the music industry. This makes it easier to believe that women don't play video games. However, that's not actually the case; we've been hearing a lot of good stuff about gaming women and games for women. Today, we'll take a closer look at one of them. Notorious Ladies is a new multimedia project created by Newgrounds, an award-winning, internet-based web community where users are encouraged to come up with original content. The game is designed to fill in some of the historical blanks and reach out to women in a unique and fun way. And as the title suggests, the game gives you the opportunity to become the infamous "Notorious Ladies" in the game. A tip: don't play this game if you don't like beards! The game starts with a tutorial, which is divided into several sessions. The main one is about walking, talking and moving around. In the main menu, you can choose to start a new game, play through the tutorial again, play a story mode or play a time trial. And yes, we know that the story mode is a little bit boring. There are eight different characters to choose from, and each of them has their own look, style and personality. They are Katia, a fiery, aggressive girl; Chi, an introverted hacker; Helen, a shy young lady with a loud voice; Corinna, a cat, as in, a small furry animal; Tobi, a shy sweet girl; Alexis, a rapper; Sam, an energetic boy; and Pela, a young girl with glasses and a close-cropped haircut. You may be wondering how to change the characters. This is done through the stats menu. On the upper right corner, you'll find a picture of each character, with a number next to it. You can press this number to see a list of different accessories. For instance, for Katia, the number is 1. If you press this, you will be able to see the arm, face and hair accessories. From the menu, you can play through a few levels. And here's where the story mode kicks in. The story mode takes you through four missions, two of them consisting of puzzles. The story mode will take you through 16 missions and seven chapters, with 18 music tracks and a range of voice actors. Each mission

Science Fair It is not that we are developing any "new" techniques, and the one I developed is still working with human hair and I see many other artists using the technique on hair. It is that because we are so limited in our knowledge and experience with experimentation and research, I have an easier time getting away with things and testing. And because I haven't been shooting in 2 years (no matter how much I have been working) my technique has become more reliable and consistent. So it is not at all new to me. My new approach is more refined and less necessary to create the photo you see in the article. I think it's going to be a HUGE upgrade to people, and I am proud of the article, the series I put together and the exposure that brings. Q: Permissions are too low? (no write access) I get this error when I'm trying to open the Preferences dialog in my app. I'm running on Windows 8.1 (x64) java.lang.SecurityException: Permission denied (no write access) at sun.laf.Window\$13.run(Unknown Source) at java.awt.event.InvocationEvent.dispatch(Unknown Source)
