AIMLite Crack+ Free Download 2022

AIMLite is designed to give you the most basic feature set that you need to enjoy the Internet. It is a piece of software that allows you to send instant messages without having to use AIM, MSN Messenger, Yahoo! Messenger, ICQ, Gadu-Gadu or any other IM program. It allows you to add people to your buddy list by typing in their AIM, MSN, Yahoo, Gadu-Gadu or ICQ nicknames or their Yahoo! Messenger ID. It also gives you the most basic tools to send and receive messages without having to download any other program. AIMLite is a lightweight alternative to programs that have been recently released to support instant messaging with AIM. AIMLite comes with basic features for all popular IM clients like Windows Live Messenger, Yahoo! Messenger, ICQ and Gadu-Gadu. It will work with any other IM client such as AOL Instant Messenger, MSN Messenger, IAC, ICQ and Gadu-Gadu as long as that client supports the buddylist. AIMLite will also support all popular IM clients such as Windows Live Messenger, Yahoo! Messenger, ICQ and Gadu-Gadu that don't support buddylist. It is extremely small, does not require any network connection and does not have any ads or spyware. To check for updates, right click on the program and click on 'Check for updates' and then simply click on 'Install updates'. If you want to be able to view your buddylist, press the down arrow and click on the advanced button. You can configure AIMLite to keep a log of all the messages you receive and have sent. It will also keep a log of your log file. You can view these logs in 'Options' and set it to be displayed in 'All messages' or 'Recent messages' or 'Trash' or 'Nothing' or 'Custom'. You can also add a customized log folder. How To Use: 1. Start AIMLite. It will come up with the AIMLite splash screen as seen in the attached image. 2. If you don't know your AIM, MSN, Yahoo, ICQ, Gadu-Gadu, or any other nicknames, press the down arrow and click on 'Advanced' button. 3. Click on 'Fill out a nick' or 'New nickname' and enter your AIM, MSN, Yahoo
